Education

National Institute of Technology,Goa

April 2020 - May 2022

Masters of Technology in Computer Science (GPA : 7.94/10)

Cuncolim, Goa

- **Relevant Coursework:** Foundation of Cryptography, Data warehousing and Data mining, Advanced Algorithms and Analysis, Mathematical Foundations of Computer Science, Advanced Computer Architecture

Dr. J. J. Magdum College of Engineering , Jaysingpur

Aug 2016 - Mar 2020

Bachelors of Engineering in Computer Science (Percentage: 78.94 %)

Kolhapur, Maharashtra

- **Relevant Coursework:** Data Structures and Algorithms, Operating System, Computer Networks, Linear Algebra ,Theory of Computation, Compiler Design

Experience

Evoke Technologies

May 2024 – Present

Software Developer (Product & Enterprise Platforms – Golang, Angular, AWS)

Hyderabad, Telangana

- Designed and developed high-performance **Golang** backend services using **REST & gRPC**, handling business workflows, telemetry ingestion, and real-time data processing.
- Built scalable microservices architectures with **Docker**, **Kubernetes (EKS/ECS)**, **AWS Lambda**, and **Step Functions**, ensuring high availability and fault tolerance.
- Implemented concurrency-optimized Go services using **goroutines**, **channels**, **worker pools**, and **context-based cancellation** for **performance-critical paths**
- Developed **Angular (v16+)** applications with **modular architecture**, **lazy loading**, **RxJS-driven state management**, and reusable component libraries for large-scale enterprise UI systems.
- Integrated event-driven systems using **Apache Kafka** , enabling **asynchronous workflows** and **decoupled service** communication.

Carrier

Aug 2022 – May 2024

Software Engineer (IoT & SaaS Applications – JavaScript, Golang, Azure)

Hyderabad, Telangana

- Worked on **IoT backend platforms** supporting connected **smoke detectors**, enabling secure communication between devices and cloud services.
- Integrated and handled **refrigeration Systems** communication using lightweight **MQTT-based messaging**, ensuring **reliable** delivery of **telemetry** from constrained **edge devices**.
- Collaborated on cloud **data pipelines** leveraging **Azure Databricks** and **distributed systems** for large-scale telemetry analysis.
- Gained hands-on exposure to **cloud-native IoT infrastructure**, including device lifecycle management, message processing, and system observability.

Projects

Design of Self Sovereign Identity in Supply Chain | *Solidity,Truffle Suite-Ganache, JavaScript, Cryptography*

- Evaluated and enhanced the speed by **7%** of the DLT system using the tool **Hyperledger Caliper**.
- Researched on **Self Sovereign Identity** as a novel authentication for distributed ledger systems.

V-Fit (Virtual Fit) | *Deep Learning, Python, Web Development, Computer Vision, HTML, CSS, Bootstrap*

- Built a fashion website to superimpose the dresses on a person's image with 83% efficacy.
- Analyzed the **VITON** dataset and trained the **GAN** (Generative Adversarial Networks) model to enhance the pose estimation and achieve 93% accuracy.

Technical Skills

Programming Languages: Golang (Primary), TypeScript/JavaScript (ES6+), SQL

Backend Systems & Frameworks: Golang (Gin), REST & gRPC APIs, Event-Driven Architecture

Frontend Technologies: Angular (v16+), React, RxJS, HTML5, CSS3

Datastores: PostgreSQL, DynamoDB, Redis

Messaging & Streaming: Apache Kafka, RabbitMQ, MQTT

Cloud & Infrastructure: AWS (EKS, ECS Fargate, Lambda, API Gateway, S3, RDS, DynamoDB, CloudWatch), Docker, Kubernetes, Infrastructure-as-Code (AWS CDK)

AI Developer Tools: ChatGPT, GitHub Copilot, Antigravity, Cursor, Claude, Gemini
